16 November 1959

MEMORANDUM FOR: Benefits and Services Division

SUBJECT : BEC Claim - [REDACTED]

1. Forwarded herewith is a claim submitted by [REDACTED] for injury suffered while he was attached to this division. The illness actually is a continuing one but the stated cause of it took place in 1956.

2. For security reasons the claim cannot state the exact location of the station at which the illness occurred and even Agency records do not show it. However, it may be stated that it was definitely a hardship post.

3. It appears from [REDACTED] statement in his memo, Para 6, that his TDY status rules out reimbursement by the Agency. On the other hand his long period of TDY duty--approximately fifteen months--should entitle him to the same protection afforded a PCS status. (The TDY status existed because it was impossible to determine how long the special program to which subject was assigned would continue.)

4. The statement of the medical officer who first examined the case is not available since the treatments were given to [REDACTED] in an out-patient status [REDACTED] and copies of any records were not forwarded to his unit. I do not believe that it would be possible to get records at this late date. This is particularly true in view of the fact that medical arrangements were handled not in routine channels but by special liaison at the hospital. It should also be pointed out that the reporting by [REDACTED] to the project medical personnel did not constitute an examination.

5. For further information on this case, please contact [REDACTED]
